PHILIP MORRIS INCORPORATED

LAW DEPARTMENT MEMORANDUM

RICHMOND, VIRGINIA

TO: Dr. T. Osdene

DATE: 10 April 1980

FROM: S. Hutcheson

SUBJECT: DELTA PATENT EFFORT

CONFIDENTIAL

Terri Gillis called yesterday to report that she was approximately one week behind on the proposed schedule for completing an application for Delta. However, she did indicate that she would have a "rough draft" completed and in our hands by the end of the week of April 14. As I reported previously, her husband has been seriously ill in the hospital for the past three weeks.

John Torrente of WLKT called today to say that H. Kothe had requested that he assist G. Brandt. He offered to come down on Tuesday, April 15 to discuss the mechanical aspects of the invention if convenient with us. He in turn would corroborate with Mr. Gillis in completing the application.

I notified Mr. Torrente that Tuesday was not a good day due to the Richmond Day meeting.

If you wish to reconsider bringing Mr. Torrente in, perhaps another day could be selected. I will await some guidance from you as to how to proceed.
